

Joe Hladnik

Software Engineer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in AI and Robotic Process Automation. Proven track record of creating and implementing successful front and back-end web applications. Looking to bring my skills to a company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs, Remote

January 2022 – Present

- Collaborated with other agency engineers and apprentices to develop new web apps as well as troubleshoot existing programs to develop better functioning applications
- Built semantically structured full stack web applications for implementation on both the agency's as well as external clients' platforms
- Applied agile methodologies like SCRUM for project management

Recent Projects:

DubbleDose (Full Stack Web App) – Fully responsive, medication and supplement/vitamin usage tracking web app built HTML5, CSS3, ES6, Express as a framework for Node.js, EJS as a templating language, and MongoDB as a database. Developed to help with the tracking of medication usage in assisted living scenarios and plot trends in health and behavior as well as helping with prevention of overmedicating by caretakers upon shift turn-overs.

Other Projects: Efficient_C (full stack web app) that assists in the plotting of your daily tasks to give you more time throughout your day, as well as a full stack app for start-ups used to track phases and tasks using React.js, Express.js, Node.js, GraphQL, and MongoDB.

Full Stack Web Developer at Joe Hladnik Web Development | Grayslake, IL

January 2020 – Present

Created full stack web applications and static websites for different clients across small and medium size businesses. Some recent clients included:

- North American Muslim Events Organization: Full stack web application built using HTML5, CSS3, ES6, SASS, jQuery, Express.js, Node.js, MongoDB as well as a custom web scraper and adapted OCR program to gather data which is used to unite mosques in major metro areas throughout the US and Canada for worship events
- Digibilt, Inc.: Web application built using HTML5, CSS3, ES6/JavaScript, SASS, and jQuery for a construction tech startup, to bring more attention and properly show the client's business offerings. Started the development of a "store" needing an extensive database using React.js, ES6/JavaScript, Node.js, SQL, MySQL, and Express.js

Territory Business Manager IL/WI at American Woodmark | Grayslake, IL

July 2021 – January 2023

- Managed Illinois and Wisconsin sales for company and built territory through scouting, presenting business cases, and onboarding new accounts, growing business over 10% to \$7M
- WPT Door style checker (full stack web app) built using HTML5, CSS3, ES6/JavaScript, SASS, jQuery, EJS, Node.js, Express.js, and MongoDB as a database. The app was built for comparison of competitor door styles in the showrooms and assistance in conversion of sales from other manufacturers
